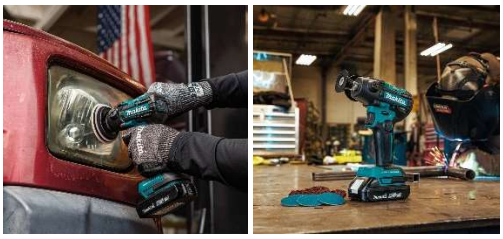
FOR IMMEDIATE RELEASE



Makita has released the new 18V LXT® 3" Polisher / 2" Sander (XVP01), featuring a compact and ergonomic design for precision detail work in both polishing and sanding applications.

MAKITA RELEASES NEW COMPACT AND ERGONOMIC SANDER AND POLISHER

New abrasive tool for the LXT® platform gives users multiple features for precision detail work

August 5, 2025, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools, power equipment, and accessories, has released a compact and ergonomic tool on the LXT® platform for precision detail work in both polishing and sanding applications. The new 18V LXT® 3" Polisher / 2" Sander (XVP01) is ideal for auto detailers with a shop, mobile auto detailers, auto/motorcycle body repair professionals, marine applications, as well as inside auto repair facilities and for use in engine repair shops.

“Makita is committed to delivering trade-focused solutions. With the automotive industry in mind, our new polisher sander is built with the power, control and versatility that detailing professionals demand.” said Nicole Tougas, senior product manager for commercial products, Makita U.S.A., Inc. “From removing rust to spot polishing, the XVP01 delivers precision work across a variety of applications.”

Dual Speeds for More Applications

The Polisher/Sander features a dual speed selector that provides 0-2,800 RPM in Polish Mode and 0-9,500 RPM in Sanding Mode. It features a variable speed trigger with power lock-on that provides added convenience for various sanding/polishing applications.

Easy Wheel Changes and Greater Stability

The Polisher/Sader features a spindle lock button for easy wheel changes and a rubberized gear housing to protect delicate surfaces from accidental damage. It also features a side handle that is angled away from the work surface preventing unwanted contact while providing for two hand control.

Increased Versatility

The Polisher/Sander features anti-restart protection that is engineered to prevent the motor from starting up when the battery is inserted, while the power switch is locked-on. The wire mesh air vent intake covers are engineered to help prevent pad fibers from entering the motor. It is equipped with 3" polishing backing plate and a 2” sanding backing plate for increased versatility.

Convenience Features

Convenience features include an ergonomically designed rubberized T-handle for increased comfort and control. The XVP01 features a lock-off power switch for added user convenience.

Makita® LXT® System

The new Polisher/Sander is part of Makita's expanding LXT® system, the world's largest cordless tool system powered by 18V Lithium-Ion batteries.
