MAKITA RELEASES NEW DUST EXTRACTOR ATTACHMENT FOR ROTARY HAMMERS

New Dust Extractor Attachment keep job sites virtually dust-free and OSHA compliant

August 5, 2025, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools, power equipment, and accessories, has released a new Rotary Hammer Dust Extractor (1914X3-8) that is ideal for use with the expansive line of Makita concrete tools and equipment.

The addition of the Rotary Hammer Dust Attachment showcases Makita's continued focus on jobsite safety and efficiency." said Nicole Tougas, senior product manager for commercial products, Makita U.S.A., Inc. "Engineered to seamlessly integrate with a broad range of XGT® and LXT® rotary hammers and vacuums, this new solution empowers professionals to maintain dust control without compromising performance or productivity."

Dust Extraction Attachment Suctions to Wall Surface

The Rotary Hammer Dust Attachment is engineered to extract dust and debris from rotary hammer holes during drilling with bits up to 2" in diameter. It features a rubber seal that suctions to wall surfaces with two air chambers to collect dust and while staying attached during drilling. The 1914X3-8 is engineered with a replaceable rubber ring for ease of use. It also features a flexible neck that provides improved position and mobility.

Complete Line of Makita Concrete Drilling Tools, Dust Extractors, and Attachments

Makita is a leader in the concrete segment with rotary hammers, dust extractors, and other attachments that are an ideal solution for drilling, breaking, demolition, and other concrete applications. Makita even has a Dust Management page (www.makitatools.com/dust-management) where users can design their own dust extraction solution, stay OSHA compliant, learn about the Auto-Start Wireless System (AWS®), and look up which tools and accessories are the correct match.
