FOR IMMEDIATE RELEASE

Makita has released the new 40V max XGT® / 18V LXT® Tower Work/Multi-Directional Light (can extend up to 8' with three adjustable heads that rotate 180°, while delivering up to 15,000 lumens, for improved worksite illumination.

MAKITA RELEASES CORDLESS MULTI-DIRECTIONAL TOWER LIGHT

Versatile and Powerful Tower Light is compatible with both LXT® and XGT® batteries

August 4, 2026, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools, power equipment, and accessories, has released the new 40V max XGT® / 18V LXT® Tower Work/Multi-Directional Light (ML014G). The new Tower Light can extend up to 8' with three adjustable heads that rotate 180°, while delivering up to 15,000 lumens for improved worksite illumination.

“The new tower light is a great addition to Makita’s extensive jobsite illumination lineup,” said Robert Monroe, product manager, drilling, fastening, and expansion, Makita U.S.A., Inc. “With the gradual power dial that lets you choose any brightness you want, and dual-platform 40V and 18V capabilities, this light will make your jobsite workable at any time and adjustable to exactly what you need!”

8 Foot Total Height and Adjustable Power Dial

The Tower Light can extend to an overall height of 8 ft. with a foldable design for quick setup and takedown. It features a fully adjustable power dial that delivers gradual illumination from 1,100 lumens up to 15,000 lumens. The L.E.D.s produce clear and bright Daylight White for added user convenience.

Run Time

The ML014G delivers up to 28 hours of continuous illumination on the low setting, with a 40V max XGT® 8.0Ah battery (battery and charger sold separately). The battery compartment is positioned at optimal height for balance and stability while elevated off the ground to reduce wear and vibration.

Convenience Features

Convenience features include a lockable battery compartment for additional security, convenient handles and shoulder strap for easy transportation, and bright L.E.D. lights that effectively illuminate the work area without the high heat of halogens. Additional features include tripod legs that are designed with additional space to attach weighted bags or spikes to secure into the ground or on a surface, for extra stability.
